

Good morning,

Subject of matter: School resource officers

To: Ontario County Sheriff: David C.

My name is Jacob Welch, I am reaching out in hopes to speak with you and your team in person, while addressing some concerns regarding safety in our public schools and other educational settings. When speaking to the previous county sheriff, Philip C. Povero, he briefly spoke to me about how resources officers are often dependent on year-to-year school funding, after the federal grant (COPS) program is spent. This leaves school administration in a tough spot when deciding on how much money they can afford to put aside, to maintain safety and security, on full-time or part-time statuses.

Safety should be the number one immediate factor for all students that are attending any kind of school setting. Schools should not have to use their funds, which are already very limited, to ensure that educational resources and materials are available to all students, in hopes to have the maximum success level and opportunity. Mr. Pavero stated to me that currently, New York State does not contribute any funds to assist in rectifying this concern. My goal is to change that, as I again believe that schools should not have to choose between full time security and safety vs educational resources and material.

Therefore, I would like to meet with you in person based on your schedule, in hopes to gain your support while also getting Senator Pam Helming's input and support. I also have been working with federal representatives with the creation of a federal department and or agencies that I have proposed that would address safety measures and funding on a national level, for educational settings and community business structure. I will send you the proposed federal agency/department for review as well. It is called DCSA (The United States Department of Community Security Administration).

Thank you for your time and I look forward to hearing from you soon.

Jacob Welch
